4 Course details

4.1	Background and Objectives	Effective governance relies on leaders who demonstrate integrity, transparency, and accountability in managing public resources and delivering services. Public institutions often face challenges such as opaque decision-making processes, limited public trust, weak oversight mechanisms, and inconsistent ethical standards. These issues may undermine citizens' confidence in government performance and hinder sustainable development outcomes. In the current context of Indonesia's government agenda, President Prabowo Subianto has placed strong emphasis on strengthening transparency, accountability, and integrity across public institutions. These priorities reflect Indonesia's Medium-Term Development Plan (2025-2029) that highlights the government's priorities based on Asta Cita, to intensify political, legal, and bureaucratic reform, and strengthen the prevention and eradication of corruption.
-----	----------------------------------	---

Transparency and accountability remain key challenges for many public institutions including political parties, justice, and civil service sectors. Transparency International's 2024 Corruption Perception Index ranks Indonesia 99th place out of 180 countries, with a score of 37/100. Improving Indonesia's score on this index requires leadership among politicians and within the civil service. The presence of dynamic and visionary young leaders who can navigate the complexities of public administration can contribute to improving public service standards, reducing corruption, promoting evidence-based decision-making, and ensuring that public officials are held responsible for their actions.

The National Strategy for Corruption Prevention (STRANAS PK), launched in 2018, mainstreams authority for corruption prevention across all institutions. The 2025-2026 Action Plan of STRANAS PK aims to strengthen digitalisation to mitigate corruption risks within bureaucracy and the economic sector. Further, the Indonesian Central Information Commission (KIP) holds annual public tests for public institutions. It aims to assess the extent to which public institutions fulfill their obligations regarding information disclosure and delivery of high-quality information services to the public. Indonesia's National Planning Ministry (*Bappenas*) has requested Australia's support to improve transparency and accountability in the public sector.

The Government of Indonesia (GoI) developed an Integrity Assessment Survey (*Survei Penilaian Integritas / SPI*) to map vulnerable areas and measure the progress of national corruption eradication efforts. SPI is conducted jointly between ministries and government institutions and led by the Corruption Eradication Commission (KPK). Moving forward, SPI will provide a benchmark in identifying areas and sectors vulnerable to corruption and to serve as a foundation for effective and constructive policy making. The 2025 SPI results show a slight improvement from the 2024 result (71.53); but Indonesia's integrity status remains as 'vulnerable' (with a result of 72.32 in 2025).

From a lawmaking standpoint, the Indonesian Parliament (DPR) has joined the Open Parliament initiative, a policy led by the Open Government Partnership that encourages transparency, participation and accountability throughout the legislative process. The initiative focuses heavily on collaboration for transparency, between the legislative and executive branches as well as with Civil Society Organisations. Key elements under this initiative include good governance, institutional development, constructive dialogues (meaningful public participation) and digital transformation.

However, the Open Parliament initiative requires strong political will to be fully implemented and achieve its objectives. Annual national surveys on public trust in public institutions consistently place the parliament at the lowest tier due to lack of transparency and accountability, particularly in the legislation process. Nationwide protests in late August-early September 2025 further underscored the public's growing demand for greater transparency and accountability from the parliament.

Supporting Indonesia's transparency and accountability efforts align with Australia's national interests in the G20 Anti-Corruption Working Group, APEC Anti-Corruption and Transparency Working Group, and the United Nations Convention against Corruption Working Group. This support contributes to the 'strong institutions' pillar of the Australia-Indonesia Development Partnership Plan 2024-2029, and complements work planned under the next phase of Australia Indonesia Partnership for Justice (AIPJ3).

- Act in ways that may place a child at risk of abuse, including not giving due consideration to assessing and reducing potential risks to children as a result of implementing activities. Behaviours and actions that are prohibited include, but are not limited to, using inappropriate language or behaviour when dealing with a child or children, bullying, and harassing a child verbally or physically, physical punishment, exposing a child to pornography including on-line grooming and trafficking. Never abuse a position to withhold development or humanitarian assistance or give preferential treatment; in order to solicit sexual favours, gifts, payments of any kind, or advantage.
- Engage in sexual relationships with members of crisis-affected populations given their increased vulnerability and since such relationships are based on inherently unequal power dynamics and undermine the credibility and integrity of aid work.

- Use any computers, mobile phones, video cameras, cameras, or social media appropriately, and never to exploit or harass children or to access child exploitation material through any medium

- Ensure photographs, films, videos, and DVDs present children in a dignified and respectful manner and not in a vulnerable or submissive manner. Children should be adequately clothed and not in poses that could be seen as sexually suggestive
- Ensure images are honest representations of the context and the facts
- Ensure file labels, meta data or text descriptions do not reveal identifying information about a child when sending images electronically or publishing images in any form.

Breaches of this child protection Code of Conduct and Client Service Standards may result in disciplinary and/or criminal action.

Corrupt Conduct

Corrupt conduct commonly involves the dishonest or partial use of power or position that results in one person/group being advantaged over another. Corruption can take many forms including, but not limited to:

- Official misconduct
- Bribery and blackmail
- Unauthorised use of confidential information
- Fraud
- Theft.

Any form of corrupt conduct will not be tolerated by the company. Action up to and including termination of this agreement will be taken in the event of any Employee participating in corrupt conduct. Conduct that constitutes a criminal offence will be referred to the appropriate authority.

- Minimising risks in the workplace.

Conduct of Current / Former Employees

Employees should not misuse their position to obtain opportunities for future employment.

Employees should not allow themselves or their work to be influenced by plans for, or offers of employment outside of Tetra Tech International Development. If they do there is a conflict of interest and their integrity and that of Tetra Tech International Development is at risk.

Former Employees should not use or take advantage of confidential information obtained in the course of their official duties that may lead to gain or profit, until it has become publicly available.

Client Service Standards

All Tetra Tech International Development staff and team members are committed to the following Client Service Standards:

- Implement activities professionally, with a focus on quality, developmental impact and long-term sustainability and with proper regard to cross-cutting development policies, such as gender and the environment, and the whole-of-government approach to development.
- Maintain productive relationships with their counterpart Government and activity stakeholders. This includes a genuine focus on transferring skills to counterparts and promoting counterparts' longer term 'ownership' throughout the delivery of the activity.
- Focus on achieving results and outcomes in a manner that is always accountable and demonstrates probity, procedural fairness, and value for money.
- Take responsibility for progress of activities, consulting actively with the client and their counterpart on

important problems and issues.

- Use experience and judgement to identify substantive problems in advance and then approach the client (and where appropriate the counterpart) with well-considered, well costed, options and recommendations.
- Demonstrate value adding, innovation, analytical rigour and quality assurance in project or activity management. This includes ensuring quality, clarity and accuracy of reporting, invoicing, and financial management.
- Promote high standards of personal conduct/behaviour, teamwork, and respect at all times. Lapses in these areas undermine relationships with counterparts, undermine activity effectiveness and reflect poorly on the client.
- Never make decisions that are the proper preserve of foreign governments and/or the funding agency, which alter the substance of the activity or create 'surprises' for the client or the counterpart.

Breaches of the Code of Conduct and Client Service Standards

Employees should note that breaches of certain sections of this Code of Conduct and Client Service Standards may be punishable under laws and legislation.

Breaches of this Code of Conduct and Client Service Standards may lead to termination of this agreement or other action.

The Service Provider acknowledges that it has read and understood the above Code of Conduct and Client Service Standards.

The Service Provider will ensure that it and its Personnel (where applicable) comply with the Code of Conduct and Client Service Standards requirements, as applicable to them as employees of an independent contractor of Tetra Tech International Development Pty Ltd.

Part E

Selection Criteria and Information Required for Price Assessment

1 Financial Proposal

Tenderers must submit a Financial Proposal as a part of their Submission in the separate MS Excel Spreadsheet provided.

It should be a stand-alone proposal and NOT to form a part of the Technical Proposal. This proposal must be submitted in a separate document. **The Financial Proposal is worth 20% of the total assessment score.**

2 Approach to the Financial Proposal

A financial price assessment of those Tenders assessed as technically suitable by the Technical Assessment Panel (TAP) will be undertaken by the TAP for Tetra Tech International Development. Tetra Tech International Development reserves the right to provide the financial component of any Tender to TAP members for their examination in the context of resource adequacy evaluation against the selection criteria in the technical assessment process.

3 Limited Information Required for Price Assessment

The final Course Budget is negotiated with the preferred tenderer. The financial detail required for the financial proposal (i.e. price assessment) includes the tenderer's management fee and personnel costs as indicated in the AAI Tender Financial Proposal Schedule 1-4 MS Excel spreadsheet (provided to the Tenderers).

Please note - Reimbursable costs associated with the course delivery are not to be included as part of the financial proposal. These costs will be negotiated with the preferred tenderer as part of the contract negotiations process in line with the mandated service levels.

Tables for inclusion within the Financial Proposal, including those containing information required for the purposes of the financial assessment, are:

Schedule 1: Personnel Course Design Cost

Schedule 2: Personnel Course Delivery Cost

Schedule 3: Fixed Management Fee

Schedule 4: Summary of Unit Costs for Tetra Tech International Development Price Comparison.

Please note! The tables are included in the AAI Tender Financial Proposal Schedule 1-4 Excel spreadsheet provided to the Tenderers.

Tenderers must complete all schedules showing their firm quotations in whole Australian dollars (\$AUD). Tetra Tech International Development requires these calculations for the purposes of disaggregating and checking the accuracy of Tenderers' total financial assessment figure. Only the final figure provided at Schedule 4 will be subject to the financial price assessment.

Tenderers should note that inaccurate or inconsistent calculations in the financial component of any Tender may, in Tetra Tech International Development's sole discretion, be grounds for Tetra Tech International Development to deem that Tender non-conforming and exclude it from further consideration under the RFT process.

4 Content of Financial Proposal

Within the Financial Proposal Tenderers must address the criteria as set out in the table below. These criteria will be used to make a like-for-like financial comparison.

Financial Proposal Criteria

Schedule 1: Personnel course design cost

Personnel costs for the design of the course, expressed as number of person days at a daily rate (i.e. cost of the Course Designer/s). The Tenderer needs to make an assessment of the number of person days required to design the course. This may be completed by one person or

more. The work may be done part-time or full-time. Tenderers must provide details in Schedule 1: Fixed personnel costs for design of course.

Schedule 2: Personnel course delivery cost

Personnel costs for the delivery of the course, expressed as number of person days at a daily rate for each of the nominated personnel. Each of these positions must include a nomination of one person only. Tenderers must provide details in Schedule 2: Fixed personnel costs for delivery of course.

The number of days used to calculate these costs will normally be greater than the actual days of course delivery. Both the Course Leader and Course Coordinator will need to work some additional days on preparation, administration and logistics, preparing the Activity Completion Report and Financial Summary, etc. Tenderers need to make their own assessment of how many person days will be required to undertake these tasks. Noting that this component forms part of the like for like assessment.

Schedule 3: Fixed management fee

Total management fee to be charged by the tenderer for the design and delivery of the course as described in the Scope of Services. This must include any applicable insurance as outlined in the Draft Contract of this RFT at Part C. Tenderers must provide details in Schedule 3: Fixed Management Fee.

Tenderers must clearly detail any “other fees” to be charged to the course (e.g. financial costs, administration costs, special fees, staff on costs, etc.). These “other fees” will be subject to approval during the contract negotiation process. Noting again that this component forms part of the like for like assessment.

The Fixed Management Fee is exclusive of personnel costs and any other costs directly associated with course design and delivery as outlined in Part B of the Service Fees:
Reimbursable expenses incurred by contractor.

5 Retention of Price Component of Tenders by Tetra Tech International Development

The financial components of all Tenders, including those not considered technically suitable, will be retained by Tetra Tech International Development.

6 Escalation

There is no provision for escalation.

7 Goods and Services Tax (GST)

Refer to clause 1.14, 1.15 and 1.16 of the draft Contract.
